PROVIDING EXPERTISE, DELIVERING EXCELLENCE

Architectural Services

With over 20 year's industry experience, BIS Salamis is a leading provider of Architectural Services, specialising in the design, upgrade, conversion and refurbishment of marine living quarters.

With an expert team of multi-discipline engineers, BIS Salamis offers a complete package of design, procurement and installation services, along with project management of personnel, materials and subcontractors required on a project.

Within the TSG, the Architectural Services team also deliver specialist projects such as GRP fabrications, module design, acoustic solutions and fire protection panel systems, utilising the highest quality materials and modern methods that are currently available.

We continuously strive to achieve the highest HSEQ standards, ensuring that projects are delivered in a safe and timely manner.

Services include:

- Offshore Surveys & Onshore Conceptual Surveys
- Outline, FEED & Detailed Design Studies
- Conceptual, Detailed Design Drawings & 3D Visualisations
- Multi-Discipline Engineering
- Work Scope Planning, Management & Fit-Out Supervision
- Specification, Procurement & Construction
- Complete Marine & Offshore Accommodation Module Refurbishments
- Offshore Door Maintenance & Repairs
- HVAC Ducting & PFEER Testing
- Domestic Electrical & Mechanical Services
- Client Tender Assistance
- Project Management

"With an excellent reputation throughout the Oil & Gas Industry, the TSG ensures the delivery of a full range of Architectural Services, specialising in the design of marine living quarters. Over 20 years of industry experience ensures that projects are delivered in a safe and timely manner, on budget and in line with client requirements."
