

TSG

Technical Support Group

PROVIDING EXPERTISE, DELIVERING EXCELLENCE

Blasting and Painting Services

Offering an experienced and flexible resource of experienced blasters/sprayers, the TSG delivers a wide range of industrial painting and preparation work scopes safely and cost effectively.

Within the TSG, a number of NACE certified coating inspectors have the capabilities to carry out specification review, fault diagnosis and 3rd party inspections. The TSG offers a complete service including expert advice and recommendations on the best solution, preparation of the site and thorough application.

BIS Salamis is an expert in the field of preparation using hand and mechanical techniques, hot water and ultra high pressure (UHP) water jetting and grit blasting. With this expertise as a foundation, the TSG focuses on the application of protective coating systems that provide excellent corrosion control at the best value whilst minimising risk to workers and the environment.

Services include:

- Process and Storage Equipment
- Pipe Work and Structural Steel
- High and Low Pressure Tanks
- Tank Linings
- Pylon and Tower Painting
- Painting for Electricity Distribution
- Technical Authorities
- Multi Discipline Support
- Project Management

"From initial survey through to completion, the TSG ensures the fulfilment of all legislative and environmental requirements, positioning BIS Salamis as a leading provider and developer of coating solutions that meet the needs of the industry."
