## Technical Support Group

PROVIDING EXPERTISE, DELIVERING EXCELLENCE

## Environmental Services

Across high-risk global industries such as oil & gas, service delivery is underpinned by standards. The **ISO 9001:2008** accreditation is testimony to BIS Salmis' capability to deliver quality and ensure safety standards.

Working to deliver the highest levels of quality and environmental standards, the TSG team continually exceeds client expectations. All BIS Salmis environmental employees are classified workers under IRR 1999 regulations.

Maintaining focus on training and meeting industry standards, all Environmental Services employees also attain professional qualifications through the BIS Salmis SVQ task-based competency programme.

With an industry leading track record and clear understanding of client requirements, the TSG is capable of catering to clients with a range of services and ongoing technical innovations.

### Services include:

- High Pressure and Ultra High Pressure Water Jetting
- Naturally Occurring Radioactive Material Handling and Offshore Disposal
- Chemical Cleaning
- Surface Preparation
- Vacuum Waste Recovery
- On-Line Vessel Desanding
- HVAC Cleaning and Maintenance
- Vessel Management
- Contaminated Solids Treatment and Disposal
- Cold Cutting
- Decommissioning Projects
- Technical Authorities
- Project Management

"Having an experienced and flexible resource of environmental engineers, the Technical Support Group is capable of delivering technical and often critical work scopes safely, effectively and with no environmental impacts."
