

TSG

Technical Support Group

PROVIDING EXPERTISE, DELIVERING EXCELLENCE

Insulation Services

BIS Salamis offers a wide range of services covering the entire insulation process, from fabrication through to installation.

Through a team of qualified insulation engineers, the TSG offers knowledge and expertise with regard to carrying out surveys, cost reports and projected manning levels, both onshore and offshore. Our team of experienced engineers has the ability to review and amend client specifications upon request and write bespoke specifications.

As part of the TSG, the Insulation Support Team also offers onshore insulation/fabrication facilities for all types of pipe-work and equipment, whilst focusing on delivering innovative ideas and consistently assessing new products from manufacturers.

The TSG constantly appraises new and innovative insulation products as they are introduced to the market - driving significant cost and time saving for clients by advising on the most appropriate insulation options available.

Services include:

- Surveys
- Specification Reviews
- Cost Estimates
- Work Pack Development
- Planning
- Onshore Fabrication
- Technical Authorities
- Engineering Support
- Project Management

"The TSG's primary focus is to integrate insulation expertise with the customers' estimating, engineering and quality control to uphold industry standards and customer specifications. The TSG works closely with customers to complete projects on-time and on-budget."
