## Technical Support Group

PROVIDING EXPERTISE, DELIVERING EXCELLENCE

## Rope Access

Industrial Rope Access is a proven method of achieving a safe work position at height or in areas of difficult access. BIS Salamis is accredited by **IRATA (Industrial Rope Access Trade Association)** and provides rope access technicians for both offshore and onshore requirements. Focused on maintaining BIS Salamis' exemplary safety record, the TSG upholds diligent operational procedures whilst ensuring all rope access personnel have undergone industry standard training and development.

The TSG supports a diverse range of customer requirements from straightforward fabric maintenance activities and complex rigging exercises through to electrical and piping work scopes, as well as the assembly and/or dismantling of structures.

Project managed by the TSG, BIS Salamis can provide self contained, multi-disciplined teams using rope access to carry out a complete range of specialist tasks.

### Services include:

- Confined Space Entry
- Rigging
- Fabric Maintenance
- Inspection
- EX Electrical
- Welding
- Construction/Decommissioning
- Technical Authorities
- Multi Discipline Support
- Project Management

"The TSG has considerable experience of responding to the challenges of providing safe access and consistently deliver large scale, complex and diverse projects. All activities are underpinned by the need to complete work scopes on time and safely."
